

Whispertone® Wallboard
Acoustical Panel Insulation

Description

Whispertone® Wallboard is manufactured from fine, rotary-process, borosilicate glass fibers bonded with a special thermosetting resin to produce a structurally rigid board-type insulation. The top surface is smooth and uniform in color. Whispertone Wallboard can be produced plain, with a top facing only or, in some sizes, faced on both the top and bottom. FSK can be adhered to the bottom side only. The countless air spaces in Whispertone Wallboard create effective sound absorption as well as thermal properties. Perceived noise from air movement and mechanical equipment is noticeably reduced.

Applications

Whispertone Wallboard can be used for office partitions, ceiling panels, wall panel applications and HVAC equipment.

Advantages

- Excellent acoustical performance
- High tensile strength
- Uniform density distribution
- Excellent dimensional stability
- Moisture and fungi resistance
- Easy handling and fabrication
- Puncture resistance

Custom Fabrication

The Johns Manville nationwide network of approved fabricators specializes in secondary processing to supply custom parts to meet customer-specific requirements. Die-cutting, laminating, special packaging and just-in-time delivery are just a few of the multiple capabilities our fabricators can provide.

Specifications

Property	Test Method	Whispertone Wallboard
Temperature Limit	–	Up to 250°F (121°C)
Fire Hazard Classification	ASTM E84 and UL 723 and CAN/ULC S102-M88. Meets NFPA 90A and 90B.	25/50

Available Forms

Whispertone Wallboard is available in a variety of densities, thicknesses, widths and lengths.
