

## Economy Extrusion

Surface Mount • IP65 Capable

The Economy Extrusion includes a frosted propylene cover which protects the LEDs from dust while hiding direct view and softening the light distribution, however polycarbonate lenses (sold separately) offer best UV protection. Use End Caps made of durable polypropylene to finish the look. Overall dimensions are 5/8" wide and 1/4" high, making it useful for cabinets, shelving, displays, and niche/accent lighting. Standard assembly listed offers IP20 protection; Use a neutral cure silicone sealant at each end and along each side of lens for IP65 rating. *Mounting suggestions: Secure using E-CLIP Mounting bracket or 3M® double-sided adhesive tape. See pages 28-31 for installation tips and suggestions.*
