RGBW, 467 mm (18.4 in), Translucent Lens

High-resolution exterior linear direct view luminaire with intelligent RGBW light

Accent Compact, RGBW is a direct view linear LED luminaire ideally suited for displaying large-scale video and graphics in a host of architectural settings. Accent Compact, RGBW adds a separate white LED, creating better-quality whites compared to RGB. Accent Compact, RGBW accepts Ethernet input from the PDS-400 48V EO to support long control runs not subject to DMX data and addressing limitations. Two lens choices are available for Accent Compact, RGBW: a clear lens which delivers the brightest output and a translucent lens which provides the widest viewing angle.

- Precise resolution control—Luminaires can be addressed and controlled in increments down to 19 mm (0.75 in), or up to 1220 mm (4 ft).
- Native, onboard Ethernet—Luminaires accept Ethernet input from PDS-400 48V EO to support long control runs not subject to DMX data and addressing limitations.
- Four luminaire lengths—315 mm (12.4 in), 467 mm (18.4 in), 619.5 mm (24.4), and 1228.5 mm (48.4 in) lengths are easily connected to create long, continuous columns or rows of intense, dynamic color. The 315 mm (12.4 in) luminaires in particular allow for extra flexibility when space is at a premium.
- Rugged, durable construction—This IP66-rated luminaire is designed to meet the taxing requirements of outdoor applications. The aluminium housing resists shock, vibration, and other forms of rough handling.
- Flexible positioning—Over-molded end-to-end locking connectors supply both power and data. Connectors can make 180° turns for easy layout. Jumper cables can add extra space between luminaires.
- Industry-leading controls—Works seamlessly with the complete Color Kinetics line of controllers, including Light System Manager and iPlayer 3, and any third-party controllers.
- Universal power input range—Accepts a universal power input range of 100 to 277 VAC for consistent installation anywhere in the world. Each 400 W, outdoor-rated PDS-400 48V EO can support multiple luminaires for creating long lines of video or ribbons of intricately changing color.
- ActiveSite integration—ActiveSite is the first ever cloud-hosted connected lighting system for architectural LED lighting installations. ActiveSite allows you to remotely monitor, manage, and maintain an installation site from anywhere in the world, using a secure web connection.

† 315 mm (12.4 in) lumen output measurements comply with IES LM-79-08 testing procedures. 610 mm (2 ft), and 1220 mm (4 ft) measurements are estimated based on the 305 mm (1 ft) measurements.

§ Lxx = xx% lumen maintenance (when light output drops below xx% of initial output). All values are given at B10, or the median value where 90% of the LED population is better than the reported or calculated lumen maintenance measurement.

¶ Minimum surge limits per IEC 61547, tested in accordance with IEC 61000-4-5.

§§ Efficacy measurements are estimated based on the 305 mm (1 ft) measurements.

¶¶ Lumen maintenance figures are based on lifetime prediction graphs supplied by LED source manufacturers. Whenever possible, figures use measurements that comply with IES LM-80-08 testing procedures. In accordance with TM-21-11, Reported values represent the interpolated value based on six times the LM-80-08 total test duration (in hours). Calculated values represent time durations that exceed six times the total test duration.
