

6" LED RECHARGEABLE RGB TRICOLOR BASE W/REMOTE

Instructions:

- Take out the light from the package and put it on a flat surface.
- Use the built-in battery, or install 3 AA batteries properly in the battery compartment.
- Press the red button on all the light bases that you need as a group to switch them on stand by.
- Press and hold the button 2 on the remote until the light bases are flickering. Then press button 7 to confirm.
- If you want a second remote to control this group of light bases, press and hold button 2 on the remote until the light bases are flickering, then press button 8 to confirm. The light bases can now be controlled by 2 remotes. Repeat this process to have a third remote controlling the lights using button 9 to confirm. You can have up to 3 remotes for each group of light bases.
