

Economy 45 Extrusion

Surface Mount • IP65 Capable

The Economy 45 Extrusion hides in small spaces where a wash of light is needed. Right angled mounting areas need 3/4" clearance on both sides to accommodate the extrusion. Common applications include cabinets, display cases, shelving, and art niches. Polypropylene lens is included, however polycarbonate lenses (sold separately) offer best UV protection. Use End Caps made of durable polypropylene to finish the look. Standard assembly listed offers IP20 protection; Use a neutral cure silicone sealant at each end and along each side of lens for IP65 rating. *Mounting suggestions: Secure using E-CLIP-45 Mounting bracket, construction adhesive, or 3M® double-sided adhesive tape. See pages 28-31 for installation tips and suggestions.*

EE45-AAFR-1M

39.4" length
Aluminum Extrusion

EE45-LENS INCLUDED

Frosted PP* EE45 Lens
(shown in extrusion)
