

## Reach Architectural Accessories

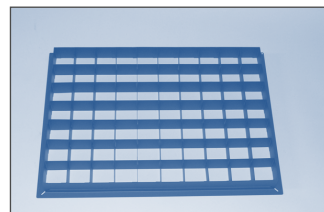

*You're almost there. You have the best and the brightest LED fixture - the Color Kinetics Reach. Now you're two steps away from perfection - a Tempest Accessory Holder, and a louver or a snoot to keep the light where you want it.*

**For Use with:**

Egg Crate Louver

Half Hat

High Hat

These Accessory Holders mount simply onto the face of the fixture, with or without beam-shaping lenses and lens gaskets in place.

Two versions of accessory holder are available, with or without Data Enabler mount.

Either will accept the rugged tempered safety glass, primarily intended for vandal protection.

You can combine the Egg Crate Louver with either the High Hat or Half Hat for ultimate control, or use them on their own.

Accessories are held permanently in place with a screw-down plate - just set it and forget it.
